Message from Chairman

Sh. Mahendra Aggarwal

“Sunder Deep Group of Institutions (SDGI) has a mission to ignite young minds and empower lives. SDGI today has emerged as one of the leading educational conglomerates in the NCR region. It fills me and my team with an overwhelming sense of joy and pride to see thousands of students pursuing higher education in SDGI and emerging as successful and responsible global citizens. Across our 8 Institutions-each one is a center of excellence in its own place. We offer a wide spectrum of undergraduate and postgraduate programs ranging from Engineering and Technology, Computer Application to Pharmacy, Hospitality, Business Administration, Architecture, Law and Hotel Management with only one objective in mind i.e. to address collectively the educational void across all strata of the society and be an integral part of the India vision. Our upcoming objective is to set up a learning temple of Dental and Medical Science, B.A.F.D. and other short duration courses. At SDGI, we constantly strive to create an effective academic platform that can drive social, cultural, scientific, economic, and technological reforms in a nation. The end state vision is to come up as a global interface through promoting an exchange of knowledge beyond national boundaries. It is my firm belief that SDGI will continue in this competitive vein, and I wish all of you a rewarding career and success in all walks of life.”

Message from Chief Mentor

Prof. K.K Aggarwal

Former Chairman- NBA &
Former Founder Vice Chancellor GGSIP University Delhi

“ Respected Parents,

I want to congratulate you for ensuring that your children finished school. It is an important achievement. However, the journey is not complete. In today's day and age, college education is more important.

Nelson Mandela called education, the most powerful weapon to change the world. In order to hone the weapon, we need higher education. Often children make the wrong choice of not finishing higher education after school. As parents it is our duty to ensure that we guide our children in the right direction. Higher education is a passport to a brighter future for us, our families, our society and our nation. At Sunder Deep Group of Institutions (SDGI), we believe in a holistic education approach that goes beyond text books. On top of technical skills, we pride ourselves in nurturing our students' attitudes and behavior towards becoming productive members of society I need your cooperation, as parents, that you ensure that your children attend all classes. In return, we promise that we will give back a DIP student i.e. a Disciplined, Intelligent Professional student. We believe education is something that should remain with us for all our lives even after we forget what we have learnt in our class. Through this philosophy, we will ensure that our next generation learns to live in a higher orbit of consciousness.”

Message from Sh. Akhil Aggarwal Vice Chairman

“ Sunder Deep Group of Institutions, embarked its journey towards the field of Technical education spurred by a search in the demand for quality engineers who were expected to shape the destiny of contemporary India, homogenize the country's interest, and usher in a new millennium with new promises. Now when we have 22 different courses at our campus, I feel privileged to be a part of the India 2020 vision of providing quality education through our Sunder Deep Group of Institutions in Ghaziabad.

“Education is the manifestation of the perfection in man.” This is the way how education was defined by Swami Vivekanand. In keeping with the same philosophy, we at SDGI strive to inspire students in this direction. At SDGI, we give students the best of facilities backed by adequate infrastructure and operational ambience like state-of-the-art laboratories, highly experienced teachers and other learning resources. Success comes to those who work hard but stays with those who do not rest on the laurels of the past. I personally look forward to integrating my experience over the years in industry and research into the learning system. We try to direct the collective efforts of the faculty to build a comprehensive methodology that encompasses education for stimulating the mind of the students in such a way that they endeavor to be responsible citizens of their country.”
